

Chrislain Avocegan

Full-Stack Developer & Systems Analyst

Profile

Full-stack developer based in Cotonou. I turn business needs into reliable web applications, from the data model to the interface.

Professional experience

Full-Stack Developer (Spring Boot & Laravel)

WEBCOM SASU | March 2026 - Present

- Requirements analysis and technical design of business applications
- Design and development of REST APIs with Spring Boot and Laravel
- Front-end development with React
- Database modelling and query optimisation

Freelance Full-Stack Developer

Self-employed - Cotonou, Benin | April 2025 - February 2026

- Stock management application: stock movements, inventory, low-stock alerts and reports
- Marketing websites for small businesses, with a back office to update content
- Mobile money and card payment integration on online stores
- Taking over existing applications: bug fixing, migration and optimisation

Laravel Project Lead

Nahema-Heaven Co. | February 2023 - April 2025

- Project planning and schedule management
- Laravel back-end development and Vue.js front-end integration
- Resource and budget management

WordPress Developer

Rohaya Holding, Rufisque | September 2022 - January 2023

- Designing mockups with Figma
- Building responsive websites with WordPress

Project Assistant Intern

PMD Developer, Dakar | February 2020 - June 2022

- Assisting with back-end development in PHP
- Contributing to project plans (schedules, milestones, deliverables)

Selected work

- Stock management: application tracking stock movements, inventory and low-stock alerts (Laravel + Vue.js)
- Byl In: full e-commerce site with integrated payments (Fedapay API), Filament (Laravel) and Nuxt.js
- LASSISSI iTech: online store for smartphones and consoles, with device trade-in (Laravel + Inertia)
- Amazone Tchad: booking management back office (Laravel + Vue.js)
- Enash Solutions: platform built with Nuxt.js, a NestJS API, S3 and Stripe
